Board of Health
Meeting Minutes
December 6, 1985

Present: G. Riggan, T. Snyder, E. Foberg, Dr. Herbert Glass
Jeff Fry, Sandra Johnson, Walter Schwartz, P.E.

At a duly called meeting of the Board of Health Mr. Schwartz of C.T. Male was present as a consultant on the problem of rectifying the pollution of the Glass and Schubert wells.

The five options for solving the problem advanced by Mr. Enser of Berkshire Enviro-Labs were considered. A sixth option was advanced and eventually became the tentative recommendation of the Board of Health. The proposal consists of drilling a well on town parkland (formerly the Molly Stanford property) and installing a pipeline along Kings Highway. The well, right-of-way to it, the piping/equipment, and the water rights are to be deeded to the affected parties. Connection to the main will be the responsiblity of each party, the cost of which is subject to reimbursement upon negotiation with the Town.

Respectfully submitted,
Melissa Quinn, Clerk
