Board of Health
Meeting Minutes
November 15, 1988

Present: Ellen Foberg, George Riggan, Marion Boggs, Aristia Veber

The meeting was called to order at 8:00 P.M.

The existing sewage system at the Rowe Camp and Conference Center Farm House has failed due to inadequate size for the volume of use. Upon performing a percolation test, John Brickett recommended an additional system. He will design a second system with a 1500 gallon tank and a 1000 square foot (100' long x 10' wide) leach bed. One curtain drain is to be installed above the new leach bed, and one curtain drain is to be installed 25 feet above the existing leach bed. The old system should then perform satisfactorily by distributing the load between the two systems.

A copy of a letter was received from DEQE to the Rowe Camp reporting that a water sample test performed at the Camp in September contained over three times the allowable coliform limit. Mrs. Foberg will check with the Camp and Mr. Enser (Berkshire Enviro-Labs) to make sure that this problem has been rectified.

Final inspections have been made on new sewage systems for Thomas Chiafalo (Potter Road) and Wayne Stickney (Middletown Hill Road) and copies of these completed applications were received.

An application for construction of a system was received from Ronald Jette (Cyrus Stage Road) but was not accompanied by plans. They are forthcoming.

The meeting adjourned at 8:25 P.M.

Respectfully submitted,
Aristia Veber, Clerk
