Board of Health
Meeting Minutes
May 26, 1993

Present: Ellen Foberg, Leonard Laffond, James O'Brien, Melissa Quinn

The meeting was called to order at 10:30 A.M.

Chairman Foberg reported the following percolation test results for tests conducted May 25 for system upgrades:

Michael & Rebecca Bradley	Map 2, Lot 12	Passed
Paul Dunnell	Map 11, Lot 36	Passed

It was noted that both systems must be completed prior to the Building Inspector signing off on completed building permits. Since the present systems has not failed, Mrs. Bradley asked if the Board would permit her to only install a new tank at this time and construct a new leach field at a later date. The Chairman called the Department of Environmental Protection and was told that this was within the authority of the local board of health. After some discussion, it was the unanimous vote to approve Mrs. Bradley's request.

Chairman Foberg reported that she had received a complaint from Building Inspector William Foster that his neighbor Terry Veber was illegally "de-leading" at his home on Zoar Road. The Chairman called the Lead Poisoning Prevention Program in Jamaica Planes and was told that home renovations are permitted providing certain precautions are used: plastic covering on floors which must be discarded when project is completed, seal off room where scraping is taking place, use only light hand sanding, not a power sander. The Chairman and Mr. Laffond attempted to visit the Veber home, but did not find anyone home. However, it was easily noted upon visiting the home that the windows casements under question are not painted but varnished instead, therefore no lead paint is involved.

The meeting adjourned at 10:50 A.M.

Respectfully submitted,
Melissa S. Quinn, Administrative Assistant
