Board of Health
October 15, 1996
Meeting Minutes

Present: Ellen Foberg, Leonard Laffond, Melissa Quinn
Absent: Jeffrey Taskey

The meeting was called to order at 7:46 PM.

Chairman Foberg noted that Dot Page is looking into the possibility of a greenhouse disposal system for her parents cottage on Pond Road (Map 2, Lot 16). Engineer Doug MacLeay looked at the property and suggested such a system with the greenhouse to be located on the left side of the house. He will research the matter further as he has not done one before. Chairman Foberg suggested that Dot apply for two building permits: the first one could cover repairs/replacement of doors and windows and the second for the addition. That would allow her to proceed with part of the work.

It was noted that Yankee Atomic Electric Company has asked for and received permission from the Park Commission to perform tests for Cesium 137 at selected sites around Pelham Lake. (Cesium 137 was released into the atmosphere in 20 or more years ago during above ground nuclear testing by one or more foreign countries.)

A well log was received from Cushing Wells for the Neil Halberg well on Pelham Lake Drive. The well is 200 feet deep and pumps 3 gallons per minute.

The meeting adjourned at 8:00 PM.

Respectfully submitted,
Melissa S. Quinn, Administrative Assistant
